

. Login Page Scope

The login page changes are styling-only.

The existing login functionality must remain unchanged. This includes:

- Authentication logic
- Login validation
- Firebase authentication
- Session behaviour
- Existing sign-in flow

The login page may be visually updated, including its layout, spacing, typography, colours, buttons and input field styling.

No changes should be made to the existing authentication or session logic.

[OBJ]

2. Team Page Fields and Display Rules

Field	Requirement	Display Rule
Team Name	Required	Display clearly as the main heading of the Team Page
Member Name	Required	Display clearly for every team member
Member Photo	Required display	Display the member's photo; if unavailable, display a placeholder
Member Role	Required	Display the member's project role
Short Blurb	Required	Display a short description of the team member

The information for each team member should be grouped clearly so that users can easily identify the member and their role.

[OBJ]

3. Edge Cases

The design should account for the following cases:

- Missing photo: If a team member does not have a photo, a default placeholder image should be displayed.
- Long member name: Long names should wrap correctly and must not break the page layout.
- Long role name: Long role names should remain readable and inside the member section or card.

- Long blurb: Long blurb text should wrap correctly and must not overflow outside its container.
- Different content lengths: Team member sections should remain visually consistent even when members have different amounts of text.

[OBJ]

4. Requirements Summary

The feature should provide a visually restyled login page while keeping the existing authentication and session behaviour unchanged.

After the login experience, users should be able to view a Team Page containing:

- Team name
- Member photo or placeholder
- Member name
- Member role
- Short member blurb

The UX design and implementation should follow the field and edge-case requirements defined in this document.
